Claim Rejections - 35 U.S.C. § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-2 are rejected under 35 U.S.C. 102(b) as being anticipated by Ivey et al. Ivey et al discloses a hollow light housing comprising two halves (10 and 11) having an upper light portion with a lens opening formed therein. The upper light portion has a downwardly facing upper groove 47 formed therein at an upper end thereof and upwardly facing lower groove 47 formed therein at a lower periphery of the lens opening. A lens assembly 51 is sized to close the lens opening and has a arm with an upwardly extending tongue 55 formed thereon engaging the upper groove. The lens assembly has a downwardly extending tongue 55 formed at a lower end thereof engaging the lower groove. The lens assembly is releasably retained in the lens opening and the arm is deflected downwardly upon an application of force in a downward direction to release the upwardly facing tongue from said upper groove permitting the lens assembly to be removed from the lens opening.

Claim Rejections - 35 U.S.C. § 103

a. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 5-11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ivey et al in view of Cohen et al. Ivey et al discloses the claimed invention except for the lamp assembly having a plurality of bulbs and switch assembly for turning the lights on and off. It would have been obvious to one skilled in the art to provide the plurality of bulbs of switch assembly of Cohen et al for the lamp assembly of Ivey et al in order to increase or decrease the amount of illumination distributed in the room.

Allowable Subject Matter

4. Claims 3-4 and 12-13 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 14-19 are allowable.

Art Unit: 2875

Prior Art

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Mauro, Yuen, McCain, Kelly and Risley disclose inventions which are similar to applicant's invention.
